Passionate self-taught developer with a never-ending thirst for knowledge. Highly motivated, tech savvy individual with a passion for continuous learning for new technologies. Continuously working towards growing into a better developer.

PROJECT EXPERIENCE

Web Consultant
Mikva Challenge Foundation

10/2017 – Present

Achievements/Tasks

- Helped non-technical partners with managing one of their websites/digital resource.
- Consulted clients on best hosting services for Wordpress.
- Configured DNS nameservers for site.

Contract Web Developer
Smart Chicago Collaboritve

07/2017 – 10/2017

Achievements/Tasks

- Converted a Jekyll based static application and redesigned and rebuilt into the PHP based WordPress platform for better control for clients.
- Built a Digital resource to help ease and simplify the expungement process for youth in Cook County, Illinois and surrounding counties. Data has proven that youth in Cook County are not expunging their records when in most cases are due to them not being aware of them having a record at all, or being intimidated by the process in whole.
- Application helps determine eligibility for expungement and connects users instantly with Legal Aid lawyers that help organize their case all FREE OF CHARGE.
- Met clients and stakeholders for input on wants and needs. Developed an Agile workflow for the project.

Web Development Intern
Dom and Tom

06/2017 – Present

Achievements/Tasks

- Learned AGILE workflow and methodologies.
- Learned to develop basic wireframes for sites.
- Began learning the MERN stack.

EDUCATION

Undergraduate
City Colleges of Chicago

01/2015 – 05/2015

Undergraduate
University of Illinois at Chicago

08/2014 – 12/2014

SKILLS

Node.js Javascript Git MongoDB
HTML5/CSS3 MVC Heroku Express.js
Debian Linux

PERSONAL PROJECTS

Foody App (07/2017 – Present)
- Developed a basic full stack application similar to Yelp, using MongoDB, Express, and Node.js (currently refactoring views with React and Redux)
- Users can sign in and post food with a description of it.
- Utilized Google Maps javascript API for geocoding resturaunts.

RGB Color Generator (06/2017 – 06/2017)
- Developed a helpful resource for designers and front-end developers to better learn RGB colors for web.
- Used Object oriented programming methods.
